

### Who We Are

There are many apps for weather and many apps for health, but KagenAir™ is the first and only app in the world that can show you exactly how your environment affects the way you feel.

### What We Do

KagenAir™ monitors thousands of weather and pollution factors across North America every hour of every day, and we created patent pending software to measure how your body responds to changes in your environment.

By comparing your symptoms each day to changes in your local weather, we can help you discover your unique Aller-Rhythm™ display.

### How We Help

Answer a few questions each day and you'll discover weather and pollution factors that affect you most. Then connect with nearby medical specialists with our secure and confidential video Quick Chat!® service.

## Unique Services

The KagenAir™ app offers unique patent pending services including:

### **Quick Chat!®**

Contact nearby physicians and clinics using KagenAir's confidential and HIPAA secure Quick Chat !®.

### **Symptom Severity Tests**

Monitor your symptoms using our copyrighted easy to use symptom severity tests for allergy, asthma, arthritis and migraine headaches.

### **Aller-Rhythm™** display

Discover how pollens, mold spores, weather and pollution factors influence your health and discover your unique Aller-Rhythm™ display as it changes throughout the year.

### **Animated Health Risk Maps**

Every hour of every day our HD quality animated Health Risk Maps reveal your chances for experiencing allergy and asthma symptoms.

### **Health + Emergency Weather Notifications**

Receive daily facts about allergy, asthma, arthritis and other health conditions. Emergency National Weather Service alerts and valuable coupons from retail associates will also be available.

## Background

Allergy, Asthma and Immunology Specialist Steve Kagen, M.D created KagenAir™, LLC to meet the needs of his patients.

KagenAir™ is an easy to use smartphone application that helps people discover how the air they breathe influences their health.

It took two years of effort from a team of talented software programmers and engineers, graphic artists and mathematicians from Europe, Canada and the United States to bring KagenAir™ to life.

The KagenAir™ app takes advantage of recent advances in processing power in new cell phones and the unlimited capacity of Cloud computing to store and analyze health information.

Working together with Allergy and Asthma Specialists across North America, KagenAir™ allows people to discover airborne factors that affect how they feel. KagenAir™ also connects people to nearby health care specialists.

KagenAir™ collaborates with allergists who study pollen and mold spore levels in the United States and Canada and with many other scientific organizations, including the Center for Disease Control (CDC), Committee on Earth Observation Satellites (CEOS), Global Observing Systems Information Center (GOSIC), Intergovernmental Panel on Climate Change (IPCC), National Oceanic and Atmospheric Administration (NOAA), National Climate Data Center (NCDC), Environmental Protection Agency (EPA), World Meteorological Organization (WMO), American College of Allergy, Asthma and Immunology (ACAAI), American Academy of Allergy, Asthma and Immunology (AAAAI) and the Allergy & Asthma Network.

Honorable Steve Kagen, M.D

Steve combines the art and practice of medicine with the most modern technology available to help clinicians diagnose and treat allergy and asthma disorders.

Dr. Kagen received an Honors Degree in Molecular Biology from the University of Wisconsin-Madison, where he also received his M.D. He trained at Northwestern University and the Medical College of Wisconsin, and is Board Certified in Internal Medicine and Allergy – Immunology. Kagen is also Board Certified in Diagnostic Laboratory Immunology. Steve returned to his hometown of Appleton, Wisconsin with his wife, Gayle, to raise their four children and open the Kagen Allergy Clinics in Appleton, Oshkosh, Green Bay and Fond du Lac, Wisconsin. [www.KagenAllergy.com](http://www.KagenAllergy.com)

Dr. Kagen has published over 60 original research articles in his specialty. Kagen and his colleague R. Muthiah PhD discovered a worldwide allergenic protein in a dust mite, *L. destructor*, for which they received a U.S. patent.

Kagen directed the National Pollen Network® (NPN®) to educate the public about the importance of pollens and molds as causes of hay fever, sinus and asthma. The Kagen Allergy Clinic and NPN produced daily weather maps for The Weather Channel and CNN revealing risks for experiencing allergy and asthma symptoms.

Steve also served in the United States House of Representatives from January 2007 to December 2010, where he succeeded in ending discrimination against patients with pre-existing medical conditions, thereby guaranteeing universal access to health care. [www.SteveKagen.com](http://www.SteveKagen.com)

Dr. Kagen's efforts to improve the health of his patients are considerable. He directed a national reference allergy-immunology laboratory and along with Dr. Muthiah developed hundreds of allergy blood tests including a test-yourself kit for AIDS and the first Lyme disease blood test in Wisconsin.

In 2015, Dr. Kagen created KagenAir™, a new smart phone application, to help people see how their local weather and environment affect their health. KagenAir™ is a trusted source of real-time weather, pollution and allergy and asthma information. [www.KagenAir.com](http://www.KagenAir.com)
